

Elwell Buildings Bin Store

A secure wheelie bin storage unit

A sturdy storage unit

Secure storage of Wheelie Bins, Roll Containers,
Gas Bottles, Cleaning Equipment, Chemical Drums etc

Building detailed 3.66m width x 5.59m length x 2.2m to 2.59m height, single 1.50m door. Terracotta plastisol cladding. Rain water goods & roof light panels

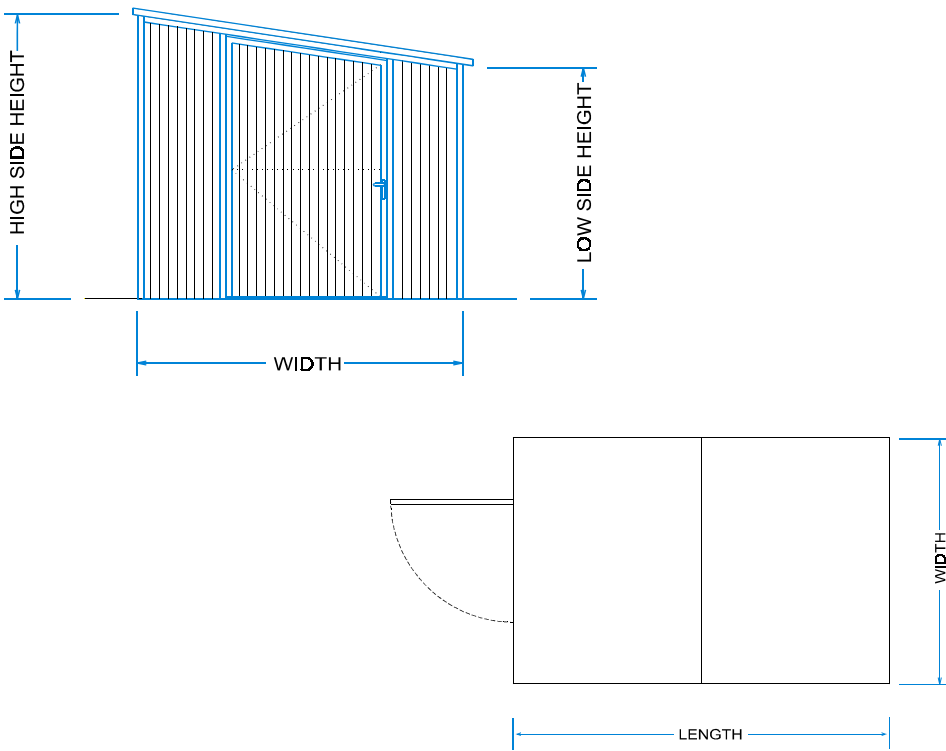

The Universal Bin Store range of secure buildings is designed to offer instant permanent or temporary solutions for waste management sites. Manufactured in factory finished panels for simple and rapid assembly, the unique design allows for erection, dismantling and re-siting in a matter of minutes. The Plasticsiol cladding has a tough durable finish and is ideal where a combination of security and appearance is important to the user. Buildings are constructed entirely from steel for strength, security and to minimise the risk of vandal or fire damage. Fixings are internal with final security achieved via a sturdy padlock facility & a 5-lever mortice deadlock.
